Keep a note of what you reviewed.

A printable record to use beside Snapshot comparison, not another export guide. Write on a printed copy. This page has no form, file upload, store connection or saved notes.

Open Snapshot comparison
Read the existing snapshot guide

Before comparing

Earlier / later export times and private file labels

Locations and variant selection: same scope, or what differs?

Do not assume two exports cover the same store selection. Use Shopify All states exports. No earlier file means this tool cannot reconstruct earlier stock.

Pick one finding to investigate

Private row reference / status / earlier and later quantities

---

What else must I check before explaining the difference?

Added or missing means membership in the exports, not proof of creation or deletion. A quantity difference does not prove a sale, loss or mistake. This compares On hand (current), not edit instructions, and never updates a store.

Leave a next step, not a guessed cause

Unresolved question / next check / review date

Screen filters do not limit the full review CSV. Keep exports, downloaded reports and this completed note private. Do not attach them to public issues. No live monitoring, import approval or support response time is promised.

Independent Vertex material, not affiliated with Shopify. Companion copy checked against the Snapshot comparison source and existing guide on October 20, 2026. No new licensing terms are supplied.
